

TWO DIGIT THREE WIRE POSITION INDICATORS: IND2DxxMM-3H

MADE IN URUGUAY

DESCRIPTION

CEA51FA and CEA31 controllers drive the series line for up to 42 three wire position indicators. The line voltage values will be 0 Vdc or +24 Vdc.

The output pin in CEA51FA controller is RAU4. Relay function code for this output must be configured equal to 0.

The output pin in CEA31 controller is the lowest right one, labeled IND3H. The ROM version must be 5.52 or higher.

INSTALLATION

The indicator has a 4 pin male connector. A female connector with three wires is supplied with each unit.

+24 Vdc power supply:
negative: black wire (must be wired to 0V terminal in the controller)
positive: red wire

Input serial command: white wire

DIMENSIONS

General dimensions are shown, in millimeters.
